

EDUCATION

University of Michigan | Ann Arbor, MI (2019–present)
Doctorate candidate in Ecology and Evolutionary Biology

University of Wisconsin–Madison | Madison, WI (2017–2019) **GPA**
MS in Agroecology 3.94

Swarthmore College | Swarthmore, PA (2012–2016) **GPA**
BA in Biology, minors in Latino & Latin American Studies and Spanish 3.87

AWARDS AND FELLOWSHIPS

2020–2021 Dr. Nancy Williams Walls Award for Field Research (April 2020)
Awarded \$1112 for fieldwork pertaining to the mycotoxin gyromitrin

Leo M. Leva Memorial Prize (May 2016)
Awarded \$800 by the Swarthmore College Department of Biology faculty for undergraduate work that showed exceptional promise for future societal impact

NSF Research Experience for Undergraduates Fellowship (May 2014)
Selected by Dr. Jane Disney at Mount Desert Island Biological Laboratories and supported by NSF to conduct summer research on seagrass ecology at Mount Desert Island Biological Labs

GRANTS

Rackham Pre–candidate Graduate Student Research Grant (March 2021)
Received \$1500 from the University of Michigan Rackham graduate school for PhD research

Rackham International Travel Grant (February 2020)
Received \$990 to attend the 36th Annual Great Lakes Mycological Meetings in London, Ontario

North American Mycoflora Project Sequencing Grant (May 2018)
Received funding to sequence the DNA of 60 fungal specimens as part of the “University of Wisconsin Arboretum Mycoflora” North American Mycoflora Project

Agroecology Program Professional Development Grant (April 2018)
Received \$300 to attend the 2018 AFHVS/ASFS conference in Madison, WI

Center for Integrated Agricultural Systems Grant (April 2018)
Received \$2,500 to conduct research on the topic of continuous living cover, specifically the community composition of arbuscular mycorrhizal fungi associating with switchgrass

University of Wisconsin Arboretum Mycoflora Grant (January 2018)
Received \$500 from the University of Wisconsin Arboretum to buy equipment and supplies for the “University of Wisconsin Arboretum Mycoflora” North American Mycoflora Project

TEACHING EXPERIENCE

Fungal Biology Graduate Student Instructor (EEB 468) | University of Michigan (Fall 2020)

- Developed hybrid course model with in-person and remote lab activities
- Utilized iNaturalist to organize, share, and educate students on observations and collections of macrofungi

Microbiology Graduate Student Instructor (BIO 207) | University of Michigan (Fall 2019, Winter 2020)

- Each term, taught two three-hour lab sections on principles and techniques of microbiology to approximately 20 undergraduate students per section
- Independently developed curriculum pertaining to introductory and supplementary background information as well as weekly lab assignments

RESEARCH EXPERIENCE

James Lab: Mycology | University of Michigan (September 2019–Present)

- Aiming to discover the genetic basis and evolutionary history of the deadly mycotoxin gyromitrin in false morel mushrooms (family *Discinaceae*)

Jackson Lab: Grassland Ecology & Biofuel Cropping Sustainability | Great Lakes Bioenergy Research Center at UW–Madison, WI (June 2017–August 2019)

- Evaluated the effects of nitrogen amendment on the community composition of arbuscular mycorrhizal fungi associating with switchgrass using PacBio metabarcoding

Pfister Lab: Fungal Taxonomy | Harvard University, MA

National Park Service | Boston Harbor Islands, Boston, MA (January–May 2017)

- Collected sporocarps from the Boston Harbor Islands for a fungal biodiversity inventory; identified collections using genetic barcoding, discovered new species and species newly reported for North America, and published peer-reviewed manuscript

Pierce Lab: Insect Phylogeny & Physiology | Harvard University, MA (July–October 2016)

- Extracted DNA from the phytotelmata (fluid) of pitcher plants to characterize interspecific differences in arthropod communities
- Exposed acacia plants (*Vachellia drepanolobium*) to the volatiles of symbiotic and parasitic ants and quantified phenotypic responses of plant

Vallen Lab: Cell Biology | Swarthmore College, PA (September–December 2014; June–September 2015)

- Developed electroporation as a technique to genetically transform the coral bleaching model organism *Aiptasia pallida*, the brown anemone
- Conducted chemotaxis assays for the attraction of larval anemones to sugars to understand how larval cnidarians detect and uptake algal symbionts

Disney Lab: Seagrass Ecology and Conservation; Williams Lab: Population Genetics | MDI Biological Laboratories, Bar Harbor, ME (June–August 2014)

- Measured the tensile strength of seagrass under various growth regimens to determine the role of dissolved silica in plant health and disease prevention
- Analyzed population genetics of invasive European green crab (*Carcinus maenas*) to determine history of introduction

PROFESSIONAL SOCIETIES

ASM: American Society for Microbiology (2019–Present)

MSA: Mycological Society of America (2018–Present)

SERVICE AND OUTREACH

Michigan Macrofunga Project Leader | Ann Arbor, MI (August 2019–Present)

- Organizing a statewide funga project as a member of Fungal Diversity Survey (previously known as North American Mycoflora Project)
- Aiming to develop a social–justice oriented model of community engagement to democratize mycology skills and support community members in their fungal engagements

Madison Mycological Society President | Madison, WI (January 2018–August 2019)

- Founded Madison's first amateur mycological society, acquired non–profit status, led Board of Directors consisting of seven volunteer community members, and grew mailing list audience to over 300 people
- Led forays every other week with a typical attendance of about 6–10 and up to two dozen people; organized monthly local mycologist lecture series

UW–Madison Arboretum Work Party Leader | UW–Madison Arboretum, Madison, WI (September 2017–August 2019)

- Restored sensitive, native ecosystems while teaching and managing teams of approximately 10 volunteers in monthly restoration work parties
